Ocean of Life

If we ‘know’ or not what water’s formula is. Water will satisfy our thirst. Life is very very simple, Life does not care how much we ‘know’, Life is all about to live and let to live, School had taught us Isaac had invented gravity, But as per our common sense gravity was already in existence in the universe before Isaac had invented, So the existence doesn’t care how much we know, God has given us intellect to survive on this planet, We have intellectual power to take decision on time, What we need to live a life? We need ‘knowingness’ to operate a machine, We have made the machines so we know how it works, So anyone one else who want to operate… Need the knowingness, But what about life? Who gave us a life? Do we need knowingness to live a life? It depends on how much conscious we are, We need consciousness, it depends on how much open we are, If we open outside who we are then life will lead us towards the fulfilment, Life will show us who we are, We will have real experiences, We will have profoundness, That way we can live original life,…Im not taking about lie, I’m talking about to live who we are, If there is lie inside you doesn’t matter, Be you who you are, So we need courage to live who we are, But I don’t tell you to be courageous, I will help you to dig into yourself, Because there is ‘knowingness’. Digging into yourself you have to throw all your knowingness, Because there is already very beautiful life inside, And when you start to live from inside you will say life is beautiful.

We do not need knowingness to be successful. We have seen that education just teaches us about past and future, What happened in the past and what to do in future, Do we have to live in the past and future? Do we exist in the past and future? Don’t we exist in the present moment? In fact we also do not need to learn how to live in present moment. Its because of fear human plans for the future, if we have courage, We will say we will see what happens, What we have to achieve in life? We just do not have to lose our peace, We do not have to lose consciousness. And I could be your friend whatever you believe me, I will throw you in life’s ocean, I can not live behalf of you. I could be your well-wisher, I could be your companion if you want to live a life.
